DESCRIPTION AND FEATURES, MATERIALS AND FINISHES

Raw material: float glass recovered from the in-house processing cycle
Table with Saturaglass bases
Top finish: smoked tempered Saturaglass

MAINTENANCE AND CLEANING

Regular, proper routine maintenance of furnishings is essential to their long-term durability. As a general rule, a few precautions are needed to avoid damaging the glass and its finishes. We recommend moving the product carefully and gently, avoiding sudden movements or setting it down abruptly. For daily cleaning, use a soft dry cloth and, occasionally, a soft damp cloth. Do not use metal scourers or abrasive sponges. Do not use ammonia, alcohol or harsh detergents containing acidic substances or chemical solvents.

ASSEMBLY INSTRUCTIONS

The top and bases are shipped and delivered unassembled.
Carefully place the two bases on the floor, then rest the top on them.
